

# Blockchain Technology

## How to Become a Blockchain Developer

Organized By **Computer Science Society**

# Blockchain Technology

## Work on:

- Ethereum Blockchain
- Solana Blockchain
- Android Apps
- Web Apps

**MUHAMMAD ZARYAB RAFIQUE**  
Blockchain Engineer

# Outlines

**What is Blockchain**

**Blockchain Career Path**

**Strong the Computer Science base**

**How to get a remote job as a student**

# What is Blockchain

Blockchain is a peer-to-peer **decentralized distributed ledger** that **permanently & chronologically** records and guarantees an **immutable, unalterable** trustworthy transaction (of money or any valuable asset) in a trust-less environment through **consensus protocol** secured by **cryptography** with **economically incentivized** participation

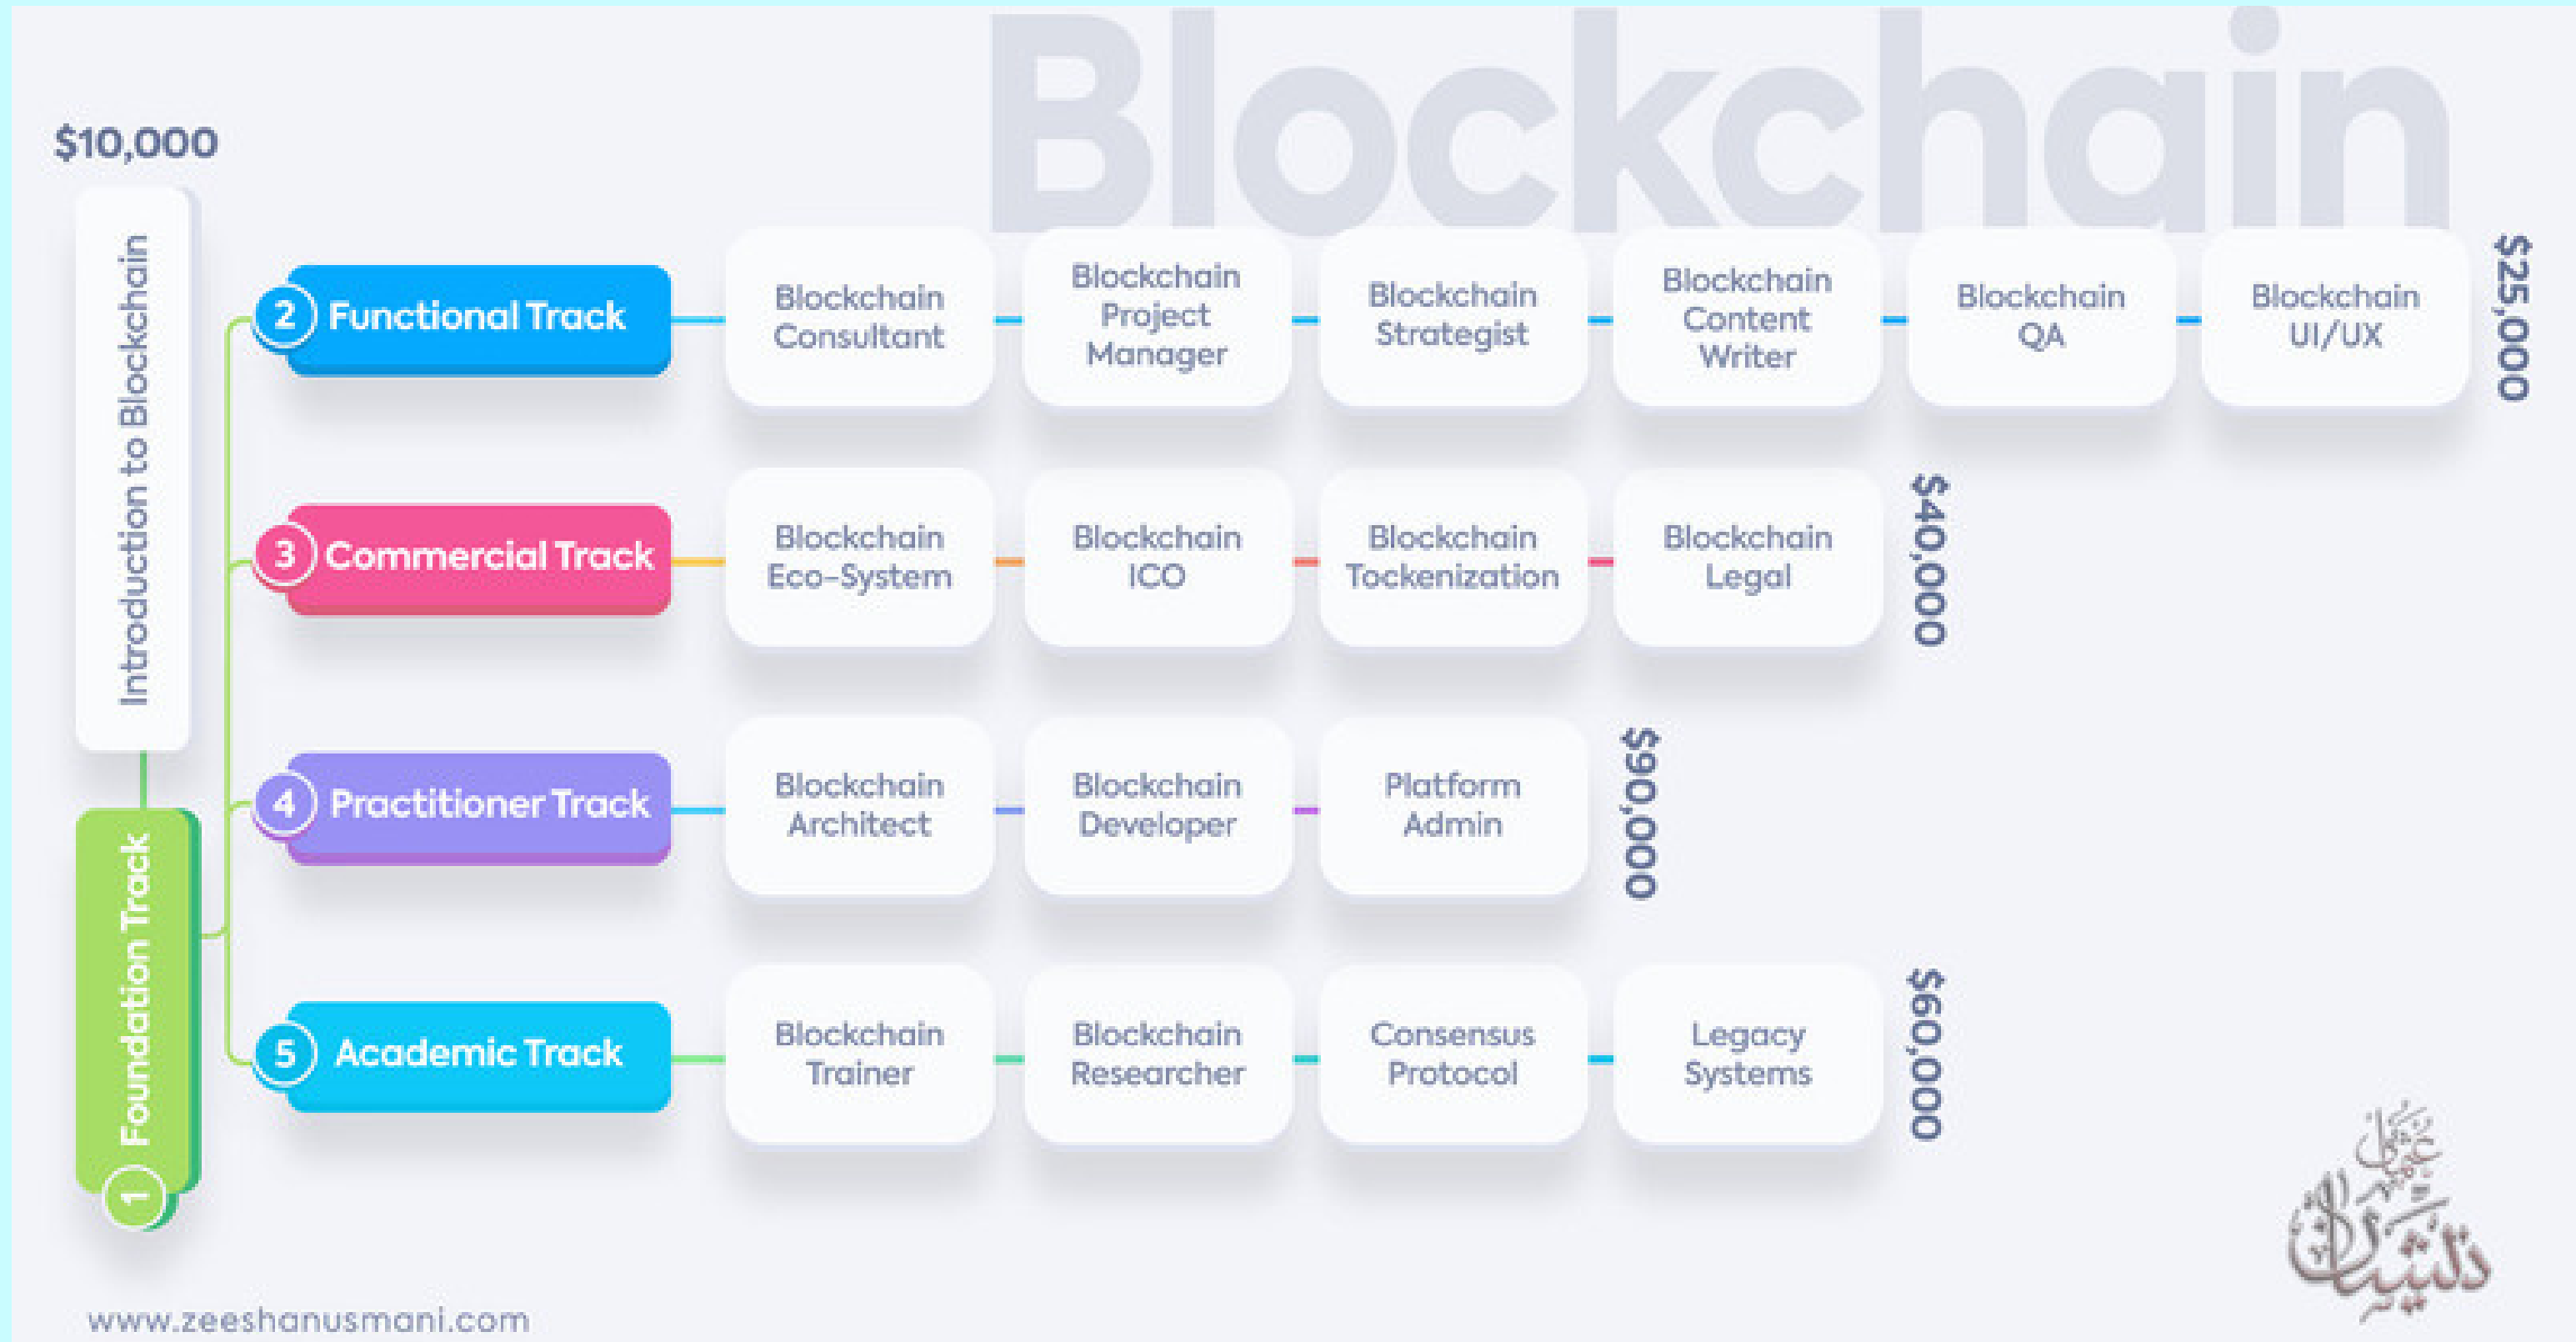

# What is Blockchain

# Blockchain Career Path

Credit: Prof. Dr. Zeeshan-ul-hassan Usmani

# Types of Blockchain Developers

```
graph TD; A[Types of Blockchain Developers] --> B[Blockchain Core Developer]; A --> C[Blockchain DApp Developer];
```

## Blockchain Core Developer

- Architecture development of a **blockchain system**
- Design **consensus protocol**
- Responsible for as well:
  - Security of their **blockchain network**

## Blockchain DApp Developer

- Build **apps** based on **blockchain architecture** called **DApps**
- **DApps** run on **blockchain**
- Responsible for:
  - **Front-end**
  - **Back-end dev of Dapps**

# Blockchain DApp Developer Career Pathway

1. **Fundamental of Blockchain** - basics, works, deep dive in blockchain
2. **Ethereum Blockchain** - is a blockchain with smart contract functionality
3. **Solidity** - for Backend (**Smart Contract** programming language)
4. **React Js** - for Frontend (JavaScript library for building UI)
5. **Truffle** - Framework (compile, test and deploy **smart contract** code)
6. **Web3 Js** - Ethereum JS API (To interact with local or remote ethereum node)
7. **Ganache** - Personal blockchain for Ethereum (enable you to develop, deploy, and test your dApps)

# Strong the Computer Science base

**Object Oriented Programming**

**Data Structure**

**Database**

**Algorithms**

**Computer Networks**

**Operating System**

# How to get a remote job as a student

- Do Learning
- Build Projects
  - Publish to Github
  - Add to your personal website
- Create Resume
  - **Nova Resume** - <https://novoresume.com>
  - **Overleaf** - <https://www.overleaf.com>
- LinkedIn Account
  - Create Account
  - Complete your profile & increase connections (connect to professionals)
  - Post about technology
  - Apply on remote jobs (at job section)

**Advise**

**Improve, Maintain**

**Health**

# Summary

- **Concept of blockchain**
- **Blockchain Career Path**
  - **Types of Blockchain Developers**
    - **Blockchain DApp Developer Career Pathway**
- **Strong the Computer Science base**
- **How to get remote job as a student**
- **Improve, Maintain Health**
